i-World

6 LEVELS · A1–B2 · 5–10 HOURS PER WEEK · CLIL inside

This series provides a blended approach which integrates autonomous online learning with classroom teaching to help students develop 21st century skills.

It is a modern, dynamic course for teenagers, which considers students as active participants in the construction of their knowledge and promotes critical thinking skills through meaningful communication.

Enhance your students' learning experience with *i-World*'s virtual learning environment

STRUCTURE

i-World Full Edition is divided into ten units, and the Split Edition is divided into five units. Each unit contains three main sections that present and practice new language:

- The **My World** section with a cross-curricular activity.
- The **Views** section with a focus on life skills and personalization.
- The **Out and About** section with a cross-cultural focus.

Each section ends with a mini project set on the virtual learning environment.

The *Student's Book* also contains extra practice to consolidate learning:

- The *World in Your Hands* is a review of the functional grammar and vocabulary presented in the unit.
- *Communicative Pairwork* activities are found at the back of the book, along with a complete *Grammar Reference* of language covered throughout the level.
- A *collaborative Project* leads to a written or oral presentation using the language and topics studied in the unit.

BENEFITS

ALLOWS YOU TO INTERACT WITH YOUR STUDENTS IN A MORE PERSONAL WAY AND ADDRESS COMMON PROBLEMS

With *i-World*'s flipped classroom approach, students will be able to extend their learning inside and outside of the classroom. They can prepare before class, focus on and consolidate key concepts in class, and extend their learning after class.

ENHANCES STUDENTS' LEARNING EXPERIENCE BY INTEGRATING ONLINE AND FACE-TO-FACE LEARNING ENVIRONMENTS

The Blended Learning Approach helps students to learn both at home and in class. *i-World* incorporates a variety of print and digital materials and allows teachers and students the flexibility to decide how and when they use them.

TEACHES STUDENTS TO COLLABORATE WITH THEIR PEERS AND BECOME RESPONSIBLE FOR THEIR LANGUAGE LEARNING PROCESS

Digital media and environments allow students to communicate and work collaboratively with their peers. Opportunities for peer- and self-evaluation support independent learning throughout each unit.

DEVELOPS STUDENTS' CRITICAL THINKING AND PROBLEM SOLVING SKILLS

i-World promotes students' use of critical thinking skills to solve problems, to plan and conduct research, to manage projects, and to make informed decisions using appropriate digital tools and resources.

RESOURCES

FOR TEACHERS

- *Teacher's Guide* with indications for when to instruct students to use the online *Worksite* and *Flip it!* activities.
- *Class CD* with complete recordings of all *Student's Book* audios.

FOR STUDENTS

- *Student's Book* with a wide range of activities for language presentation and practice.

ONLINE RESOURCES

- **Digital *Student's Book*** enriched with links to secure websites for project work, videos, and interactive activities for further practice.
- **Online Reader** with a collection of informative and narrative texts and comprehension activities.

- **Worksite** with interactive grammar, vocabulary, and pronunciation activities.
- **Digital *Teacher's Guide*** with fully enriched *Student's Book*.
- **Downloadable resources** for international exam practice (Cambridge PET exam).

- *Assignment* and *Marksheet* tools to keep track of students' progress and achievement.
